Versatile Full Stack Developer proficient in building responsive and dynamic web applications using MERN and Laravel. Experienced in RESTful API design, cloud services (Firebase, AWS, Azure), database designing and optimization, and responsive UI development with React, Tailwind CSS and Bootstrap. Delivered web applications such as geofenced attendance system and payroll, itinerary-based websites, and interactive forums. Skilled in Git-based version control, team collaborations and agile development. Fast-learner with a proactive mindset, committed to delivering effective, user-focused digital solutions.

Past Projects/Capstones

Full Stack MERN Stack Web Developer

Jul 2025 - Oct 2025

Calamba Department of Tourism | Calamba City, Laguna

- Developed 10+ full-stack web modules including CRUD systems, Google Maps API integration, geolocation-based itinerary planning, and distance filtering.
- Built interactive dashboards and clustered map visualizations with analytics widgets and custom metrics for improved data analysis and navigation.
- Optimized MongoDB data handling using schema design, indexing, pagination, caching, filtering, and aggregation pipelines to support efficient processing of hundreds of records.
- Implemented a rewards and achievement system for users and partner establishments with points tracking and milestone-based incentives.
- Developed 20+ reusable React components, custom hooks, and context-based state management, reducing duplicated front-end code and improving maintainability.
- Deployed and maintained applications on an Ubuntu VPS using PM2, Nginx, Git, and CertBot SSL, enabling secure HTTPS production deployment and process management.

Backend Laravel Web Developer

Aug 2024 - Mar 2025

Southern Technology | Sta. Rosa, Laguna

- Developed and secured backend systems using Laravel, MySQL, Firebase REST API, and RESTful APIs, enabling real-time attendance synchronization between web and mobile applications.
- Designed and implemented 15+ relational database tables, CRUD modules, and role-based authentication and authorization systems to support payroll operations.
- Built payroll service layers that automated attendance tracking, overtime, holiday pay, late detection, leave processing, and payroll computations, reducing manual payroll processing.
- Led backend development by coordinating API contracts, database design, and system integration with frontend and Android developers in an Agile team environment.
- Deployed and maintained the application on Hostinger using Git-based deployments and scheduled cron jobs, supporting payroll automation for 20+ employees across multiple projects.

Core Skills

Frontend Development: HTML5, JavaScript, ReactJS, Tailwind CSS, Flowbite, Bootstrap, NodeJS,

Backend Development: PHP, Laravel (Blade), Node.js, RESTful API Design & Integration, Python, FastAPI, Java

Data & Analytics: Microsoft Excel (Advanced – Data Cleaning, Validation, Pivot Tables, VBA), Data Cleaning & Preprocessing, Data Validation, Data Visualization (Power BI), Basic Data Analysis, Data Mapping

Work Experience

Data Administration Intern

Dec 2025 - April 2026

National Reinsurance Corporation of the Philippines | *Bel-air, Makati City*

- Cleaned, validated, and organized Excel datasets containing 10,000+ records to ensure data accuracy and reporting readiness.
- Identified data anomalies and collaborated with cross-functional teams to resolve inconsistencies and improve data integrity.
- Assisted in preparing regulatory reports for the Insurance Commission by extracting, validating, and organizing key insurance data, including premiums and sums assured.
- Verified premium calculations against expected values to support accurate reporting and regulatory compliance.
- Utilized advanced Microsoft Excel functions, shortcuts, and basic VBA to streamline repetitive data processing tasks for large datasets.

Databases: MySQL, MongoDB, PostgreSQL, Firebase, Database Design & Optimization

Frameworks & Tools: MERN Stack, Git, GitHub, Postman (API Testing), Notion, Agile Development

Cloud & Systems: Microsoft Azure, AWS, Google Cloud, Salesforce, Microsoft Office 365, Microsoft Access, XAMPP, Vercel, Hostinger, VMware, Cisco Packet Tracer

Education

National University Laguna

Aug 2022 – Jul 2026

Bachelor of Science in Information Technology:
Cum Laude

Awards

Certificate of Recognition SCS Techfest 2025

Hackathon 1st Place | *National University Laguna*
Jan 2025

Certificate of Participation Semi-Finals

Pitching & Demo 2025 | *PacketHacks*
Aug 2025

Certificates

Information Technology Specialist in Network

Security | *Certiport*
2023

Salesforce Supported Virtual Internship

Program 2025 – Philippines | *Salesforce*
2025
